# Moneyworks Pricebook

You will need

- in custom plug-ins/scripts folder:
    - Our productdiscount.wsc script installed
    - Helper.scpt
- The script to be registered (nb complicated command line registration needed on Win64 systems)
- pricebook.txt installed to custom plug-ins

Formate of entries in the pricebook.txt file

- 3 columns separated by tabs (press the tab key, not the space bar)
    - customer code
    - item code
    - special price(s) for use when this product is supplied to this customer
- Format of price breaks
    - a colon between qty-price pairs
    - a hyphen between qty and price
    - So in the example below the customer SMITH will pay for item BA100
        - $10 if the quantity is less than 5
        - $9.50 if the quantity is greater than or equal to 5
        - $9.20 if the quantity is greater than or equal to 10
        - etc.

```
Smith    BA100    10:5-9.50:10-9.20:20-9:30-8:40-5
BROWN    BA100    110:3-105:5-100:10-90
SMITH    BA200    200:10-150
brown    ba200    500
ASCENT   ZPS      250:5-230:10-210:100-190
```
