Requires: Moneyworks v8

## What it does

This Moneyworks script allows you to record and use a set of prices for each product or a group of products for each of your customers or a group of customers. Prices can include price breaks for different quantities.

# **Setup and Installation**

• Double-click the script supplied by Sustainable Solutions. Once it is installed, PriceBookList icon will be appear in toolbar of the Product table. To open Product table **Show>Product** 

		· / 🗆 🛥 🖶 🖯 0 0 🐣 🎕 🔼 0

Deport on rejection	TT_PROD	Test Product 0.00	ea	10						
	11			10						

• If you have prices based on Customer group and Product group, record customer group code in Name Category 4 and Product group code in Product Category 1.

# **Viewing and Setting prices**

- 1. Show the product list by choosing **Show > Products**
- 2. Click the **PriceBookList** button in the toolbar. You can see all the prices set for each customer/group of customers for a product/group of products in the list.

4. Click the **New** button in the toolbar

Group of Custor ✓ Customer	mers	WHITE White Contractors		
Product	•	BC100		
		Bronze Taper Widge	t Small	
Special	10			
Qty Break 1	10	Price Br	eak 1	8
Qty Break 2	30	Price Br	eak 2	7
Qty Break 3	50	Price Br	eak 3	6
Qty Break 4	100	Price Br	eak 4	5
Expiry Date:	31/01/2038			
		Cancel	ОК	

- 6. Select **Customer** for customer code and **Group of Customer** for customer group code.
- 7. Select **Product** for product code and **Group of Products** for a product group code.
- 8. You'll be alerted if you enter an invalid customer/product code.
- 9. You only have to fill in a Special price. Other fields are optional
- 10. If there is no expiry date for the special prices, enter a date well into the future (e.g. 1/1/50) else it will take defaut future date. You can't leave it blank.
- 11. You will get an alert if the record is already in the price book. You can choose to delete or edit or print the record.
- 12. Avoid using "Duplicate" option. This creates duplicated record but if you don't change the record(name and item), it will create same record in pricebook data. In that case, script will not update price from pricebook because of conflict.

#### **Using special prices**

5.

• There is nothing special you have to do. When entering a sales order or Quotes or invoices, when you select a combination of customer and product that has special pricing, that pricing will be used. See the previous report example: customer "BSUPP" has a price of \$20 for the product BA100. The price is inserted automatically.

Debtor: E	ROWN	4		Period:	Jan:2	015/16 en	nds 31/01/2016	5	0				
Invoice #: 2	134			Date:	31/01	1/2016	Price Code	A		0			
Order #:				Due Date:	20/02	2/2016	÷						
► To: E	Brown Supp	liers											
Description:			•	Analysis:			Sales	perso	n:				
User 1:		User 2:		User 3:	002			User	4:				
User 5:		User 6:		User 7:				User	8:				
Amount:	138	3.00 Deposit		Colour:	None		0	Flag: F	•				
				By Acco	ount	By Item							
Item		escription		Unit Price		Disc.%	Extension		Job	Serial/Batch	Date	Location	
CA200	10 C	hrome Widget Medium		12.0	0 ea	0	120.00	G		-			
													11
													4
Total Cost		£68.48				Subtot: GST:	120.00						
101	al Margin:	£51.52/43%				Total:	138.00						

- •
- If the quantity was increased to above a price break level, the price is updated to the relevant price you've specified.

### Importing prices in bulk

- If you have a lot of prices to be uploaded into Moneyworks at once, you can import them from text file in following format.
- To import Command>Import PriceBook
- Select prices text file and click on **Open**
- Test file format
  - $\circ$  4 columns separated by tabs (press the tab key, not the space bar)
    - customer/customer Group code
    - item/Item Group code
    - special price(s) for use when this product is supplied to this customer
    - Expiry Date. It can be blank, if there is no expiry data. Moneyworks will assign future date
  - Format of price breaks
    - a colon between qty-price pairs
    - a hyphen between qty and price
    - So in the example below the customer SMITH will pay for item BA100
    - \$10 if the quantity is less than 5
    - \$9.50 if the quantity is greater than or equal to 5
    - \$9.20 if the quantity is greater than or equal to 10
    - etc.

#### **Important Caveats**

If you change the product or name code of an item, the special pricing information will be lost. You will have to re-enter the information for any customer/item combinations that are affected.

## **Technical information**

This script uses Moneyworks' user2 table to store information

Field	Data stored
	concatenated Name SequenceNumber/Name group Code plus product SequenceNumber/product group code
Text1	Name Code/Name group Code
Text2	Product Code/Product group Code
Text	The special price(s) of the item along with the price breaks in format special_price;pricebreak1-specialprice1;pricebreak2-specialprice2;etc
Date1	The expiry date of the price. Set to 1/1/2040 if you don't want the item to expire
