Billig Shipping Script

The Billig shipping script, named 'Export_Billig' in the Airtox File, is for sending shipping orders to Billig (BA) for processing. It runs as a MW script and uses CURL to send shipping orders over tcp/http. It is triggered by selecting Sales Invoices and pressing the “Export Billig” button.

Technical documentation

Key features:

- **MW Sales Invoice Sending:** Sends selected sales invoices to the Billig API.
- **Checks Sales Invoices not already processed:** Uses Transaction field user_4. Puts a timestamp if already sent. err:err text if error.
- **Validates Delivery Addresses:** Checks the delivery address meets criteria. More info below
- **Validates Country 2 Char representation:** Billig API uses 2 Char country digits for addresses
- **TODO:** Add more feature text

Main modules:

- mw_to_ubl.rs: MW → UBL/Edimondo export logic.
- ubl_to_mw.rs: Edimondo → MW import logic.
- mw.rs: MW API communication.
- edimondo.rs: Edimondo API communication.
- invoice.rs, order.rs: UBL document construction and parsing.
- export.rs, operations.rs: MW transaction and detail handling.
- db.rs: Database operations for exports/imports.
- config.rs: Configuration management.
- utilities.rs: Utility functions.

Entry point:

main.rs calls `start_server` which runs the main service loop.
